“ Dave and my father worked together in Ag Chem at OSU. When we used to go up to have popcorn, Dave used to pick us up by our ankles to shake the change out of our pockets. He was always so much fun and we always looked forward to seeing him. I'll remember him at all the summer picnics and his big smile. And, that we all got chicken pox from his daughter (parents did it on purpose). :-) He will be missed!

Rod Johnson (Carl and Chris are my siblings, Gene is my dad)

“ I worked with Dave back in the days of ManTech at the EPA lab in Corvallis. He was fun and professional. My husband and I spent several happy days at their school kid events out at their farm, chasing bugs explaining nature, watching eggs get dropped from a helicopter. These are very special memories to us. In the years since then it was always nice to randomly bump into him and feel his warmth and friendship. Here is to happy memories!
Our thoughts are with your family Love Toni Hoyman and Jay Sexton
